

## G24 HALF SPIRAL ELECTRONIC PLC LAMP

saveOne™ (Patent pending) **G24 Half Spiral Electronic PLC Lamp** can be used with or without existing conventional magnetic ballast. Wiring modification will not be necessary and saveOne™ **G24 PLC Half Spiral Lamp** also helps to save electricity and heat reduction of up to 30%.

It is unique and better than 2H /2U PLC lamps and tubes. With longer lamp life and better brightness, it will reduce lamp disposals, and improve usage convenience.

### ADVANTAGES OF HALF SPIRAL PLC LAMPS AGAINST NORMAL 2H OR 2U LAMPS

Horizontal down-light type  
-No self-obstruction of  
luminance

Half spiral lamp will not break  
easily. Stronger and longer lamp  
life reduces lamp disposal.

Easy installation for  
horizontal down light fitting  
against 2H/2U PLC lamps

Vertical down-light type  
With circular uniform  
reflection

### Advantages of saveOne™ G24 PLC Half Spiral Electronic PLC Lamp

1. Easy to handle during installation and replacement.
2. Well balanced light reflection in a down-light bell reflector.
3. Provides lower current and reduce heat generation.
4. Durable, due to no joint on the spiral lamp tube; unlike the 2H/2U tubes.
5. Tri-phosphor powder is used in the lamp, resulting in 30% brighter and 30% longer lifespan.
6. No self-blockage of luminance.
7. Soft and instant start, with non- flickering lighting.
8. Power factor is further increased without having to remove the existing magnetic ballast.
9. Can be used with or without any conventional magnetic ballast.
